

HarmonyScape: Pre-Survey

Hello and thank you for participating in my user study!

This project is for my dissertation on Inclusive 3D Exploration with Music for Intellectual Disabilities, which has been developed through Unity. Tailored specifically for individuals with intellectual disabilities.

The aim of this experiment is to gather feedback on different elements of the game, including overall experience, goal clarity and navigation, memory and cognitive load, musical experience, and potential barriers faced by individuals with intellectual disabilities while playing the game. Additionally, the study aims to explore perceptions regarding the usability and suitability of the game interface for individuals with intellectual disabilities, including conditions like Alzheimer's, as well as the potential impact of game design on stress and anxiety levels during gameplay.

If you have any questions after the running of the experiment, please contact me, Robbie Tippen, at 2403237t@student.gla.ac.uk. This form will require some identifiable data (age, gender and email) in order to perform analysis on demographic trends. All data collected will be kept strictly confidential and used solely for academic research purposes. Your participation is voluntary, and you may withdraw at any time.

Thank you again for participating!
